

Intelliprint 9035

Unmatched Fusion of Performance and Productivity

Excellent Speed, Robust Duty Cycle.

The 9035n prints at speeds up to 35 pages per minute with a first page out time of less than 9 seconds. In addition to the rapid printing speeds, the 9035n is capable of handling duty cycles of up to 150,000 pages per month. This kind of performance allows the 9035n to be relied upon in even the most demanding printing environments – situations in which many printers may fail, but where the 9035N fits best!

Productivity Enhancing Controller Architecture.

The 9035 incorporates the Intelliprint Controller Architecture – a proprietary printing control technology developed by TallyGenicom to provide users with an unmatched fusion of performance and productivity enhancement. Features such as password-protected printing, saved job library and job accounting set the 9035n apart from the competition, and ensure that the 9035 is not just a printer, but a highly flexible document creation tool. In addition to the productivity enhancements offered by the Intelliprint Controller architecture, the 9035n also boasts a class-leading 405 MHz processor, Adobe PostScript 3 and PCL 6 and PCL 5e functionality.
